

What's the Big deal about big6?

Are you and your students suffering from information overload? Too much to know; too little time to learn it or teach it? As an alternative to speeding things up to try to keep up, we offer a smarter solution, one that helps students develop the skills and understanding they need to find, process, and use information effectively. This solution focuses on process and content. Some people call this smarter solution information literacy or information problem solving. We call it **BIG6**.

"Enriching Lives
Through Quality
Learning For All"

Offered by Steve Koelker
and Connie Burns

What's the Big deal about big6?
